### Agile Scrum

Agile Scrum software development methods (fit for IT pros and business experts) are practiced in business environments all over the world. At Directions, we offer flexible education options, one-on-one attention with our instructors and we empower our students to land their next job.

**We help you get trained, certified and back to work!**

---

**Project Management Institute’s - Agile Certified Practitioner (PMI-ACP)**

PMI-ACP training will prepare you for ACP certification, the industry standard for those who lead Agile software projects that adapt to change, drive innovation and deliver on-time business value.

---

**Agile Scrum ScrumMaster Training**

In this ScrumMaster training course you will learn, understand and execute on the three overarching principles behind Scrum: iterative development, self-management, and visibility.

---

**International Consortium for Agile (ICAgile)**

ICAgile offers 3 levels of certification: The Professional level recognizes knowledge acquisition; the Expert level evaluates a learner’s competency and the Master Agilist level acknowledges an individual’s proficiency.

---

**Why Agile?**

To stay relevant in the competitive, professional world, it’s increasingly important that professionals can demonstrate true leadership ability on today’s software projects.

---

**What is Scrum?**

Scrum is the agile development process that allows teams to deliver usable software periodically throughout the life of the project, evolving with new requirements as the project proceeds.

---

**Why are there so many combinations within the ICAgile credentials?**

Agile project environments are rapidly becoming the norm, and there are a number of important and distinct roles required. The ICAgile certification "flavors" are built to foster these roles.

---

**Why Directions?**

- Over 20 years of training experience
- Satisfaction guarantee: 6 month free retake
- Access to top recruiters, tools and workshops to help land your dream job
- Live instructor-led training: Rub shoulders with industry professionals
- Virtual instructor-led training: Enjoy the flexibility of taking classes from home
- Online labs 24/7: Practice what you’ve learned

---

**Our Instructors**

- Minimum of 10 years of teaching experience in IT and Project Management
- Apply instruction to real world experiences
- Certified by nationally recognized accredited governing bodies
- Hand selected to ensure they meet the needs of every student
- Receive above benchmark scores on student evaluations
- Small class sizes allowing one-on-one instruction
